Notes:
The term "Marihuana" was used for most Cannabis related drug seizures until late 2018. You will therefore not see any "Marihuana" seizures in 2019 and 2020. Likewise, Cannabis related seizures and its subcategories were not used until 2017 and not fully used until late 2018 when "Marihuana" ceased to be a category.

Dosages generally (but not always) refer to Cannabis products that are produced in a measured unit often seen in cartidges used for smoking/vaping.

These stats represent: All drug seizures are for British Columbia, All modes (Traveller and Commercial), All Ports of entry (Land Borders/Airports/Postal, ETC), All import and export seizures. The system used to track seizures do not differentiate between import and export seizures and are therfore all included together.

The stats also represent seizure counts. What this means is if one traveller has 4 types of drugs seized, it counts as 4 seizure counts.

Options - All Modes, All Seizure Types, Normalized Unit of Measurement, Northern Ontario Region

With the legalization of cannabis in Canada on October 17th, 2018. According to CBSA guidelines ; "Cannabis that is declared, and not accompanied by Health Canada authorization, absent other indications of non-compliance, should be detained and recorded as "forfeited" in ICES as a matter of routine." Therefore, a significant portion of cannabis related seizures in ICES are in fact forfeitures with no Customs Act offence.

Please note that for the purposes of these statistics, each type of drug seized represents a seizure count. For example, if a traveller has three different forms of Cannabis seized in one enforcement action, that represents three seizure counts.

- Cannabis Categories in ICES :
- Cannabis contained in Non-Solids
 - Cannabis contained in Solids
 - Cannabis - Concentrates
 - Cannabis - Dried
 - Cannabis - Fresh
 - Cannabis - Seeds
 - Cannabis - Synthetic
 - Hashish

Forfeited cannabis seizures

Source: COGNOS, Drug Type Commodity Self-Reporting

Notes:

The "Number of Seizures/Forfeitures" column represents the number of seizures/forfeitures that includes the drug type or unit of mesure. For example, if a traveller is in possition of 2 types of drugs, this would be counted as 2 seizure/forfeiture in the above report. The same applies to the unit of measure.

Since cannabis was legalized in Canada on the 17 October, 2018 any cannabis being declared by a traveller is documented as a forfeiture while non-declared cannabis is documented as a seizure.
